SUMMARY

PHP Full Stack Developer with **4+ years** of professional experience building scalable web applications using **Laravel** and **CodeIgniter**. Experienced in designing modular architectures, developing **REST APIs**, and implementing secure **JWT-based authentication**. Strong understanding of **SOLID principles**, the **Repository-Service pattern**, database optimization, and third-party integrations including **Stripe**, **Razorpay**, and **AWS services**. Passionate about building maintainable, production-ready applications with clean, scalable architectures.

EXPERIENCE

PHP DEVELOPER | SRV INFOTECH

June 2025 – Present | Kannur, Kerala

- Building modular CMS applications in Laravel with a focus on scalability and maintainability.
- Applied the Repository-Service pattern within a modular architecture to improve code maintainability and separation of concerns.
- Integrated **Razorpay** payment gateway with secure payment verification and webhook handling for reliable transactions.

PHP DEVELOPER | WEAMSE BUSINESS SOLUTIONS

August 2024 - April 2025 | Talipparamba, Kannur, Kerala

- Built 30+ REST API endpoints using Laravel and CodeIgniter to support scalable business workflows.
- Integrated APIs with React using JWT-based authentication for secure frontend-backend communication.
- Applied the Repository-Service pattern and SOLID principles to build modular and maintainable systems.
- Implemented asynchronous processing using **Laravel Queues** and scheduled commands for background automation.
- Integrated Stripe payment gateway with secure webhook validation and idempotent processing to ensure reliable payment processing.
- Developed 3+ REST API and full-stack projects, delivering new features and improving application workflows.
- Optimized MySQL queries using indexing and eager loading to reduce latency and eliminate N+1 query issues.

PHP DEVELOPER | NETPLEX

April 2022 - July 2024 | Talipparamba, Kannur, Kerala

- Worked on and maintained web applications using PHP, Laravel, and CodeIgniter across retail ERP and recharge management systems.
- Developed and enhanced billing, inventory, and recharge modules to improve business operations.
- Enhanced project functionality by 90% through new feature development and structured module maintenance.
- Resolved 80% of critical production issues, improving system stability and application performance.

SKILLS

Languages:	PHP , JavaScript	Databases: MySQL , MS SQL Server
Frameworks:	Laravel , CodeIgniter	Version Control: Git , GitHub
Frontend:	HTML , CSS , Bootstrap , Tailwind CSS , jQuery , AJAX	Payments: Stripe , Razorpay
Backend:	REST APIs , JWT Authentication , Repository-Service Pattern , SOLID , Laravel Queues , Query Optimization	Tools: Postman , cPanel
Cloud & Services:	AWS S3 , AWS SNS , SMTP	Currently Learning: React.js

EDUCATION

MASTER OF COMPUTER APPLICATION (MCA) KANNUR UNIVERSITY CAMPUS, MANGATTUPARAMBA
June 2018 – August 2021 | Kannur, Kerala | CGPA: 7.82

BSC COMPUTER SCIENCE IHRD COLLEGE OF APPLIED SCIENCE, NERUVAMBRAM, UNDER KANNUR UNIVERSITY
June 2015 – March 2018 | Pazayangadi, Kannur, Kerala | OGPA: 8.15

PROJECTS

PLEXBILL

Tech Stack : PHP Laravel, MySQL, jQuery, AJAX, JavaScript, Bootstrap

- Architected and enhanced **Plexbill**, a **Retail ERP (Billing & Inventory Management System)** for UAE retail businesses.
- Developed and maintained core modules including **Products, Inventory, Sales & Billing, Purchases, Customers, Suppliers, Accounts, Expenses, and Reports**.
- Enhanced application functionality by **90%** through new feature development, module enhancements, and ongoing maintenance.
- Improved system reliability and performance by **50%**, contributing to a **45%** increase in user satisfaction.
- Diagnosed and resolved complex production issues, improving application stability, performance, and overall user experience.

MINIMALIST E-COMMERCE PLATFORM

Tech Stack : Laravel, MySQL, REST APIs, JWT, SMTP, React

- Developed REST APIs for a minimalist e-commerce platform using Laravel, including **product catalog, categories, product variants, cart, orders, authentication, and payment** functionality.
- Integrated the Stripe payment gateway and implemented secure checkout flows for both guest and registered users.
- Built optimized REST APIs and backend services to support efficient content delivery and user interactions.
- Collaborated with the frontend team to integrate APIs using React and RTK Query.

CLEVER CAFE

Tech Stack : Laravel, MySQL, REST APIs, JWT, SMTP, AWS S3 (File Storage)

- Engineered and maintained REST APIs using Laravel to support platform functionality and improve application performance.
- Developed the Support and Community modules to enhance user engagement and issue resolution.
- Enhanced the Business Materials module and implemented secure Admin Authentication with role-based access control.
- Developed and maintained the Articles module for content management and categorization.
- Optimized database design and SQL queries, resulting in improved application performance and reliable data retrieval.

PERFORMANCE REVIEW SYSTEM

Tech Stack : PHP Laravel, MySQL, jQuery, AJAX, JavaScript, Bootstrap, SMTP

- Developed and enhanced a Performance Review System to streamline employee evaluations and team management.
- Implemented Team Lead Management for creating, assigning, and managing team leads.
- Developed Team Creation and Management features for structured team organization and supervision.
- Built a dynamic form management system that enables administrators to create and distribute evaluation forms via email.
- Implemented employee evaluation form submission with a star rating system for standardized performance reviews.
- Integrated email notifications with secure, single-use evaluation links that expire after 24 hours, improving timely form completion.

PLEXPAY

Tech Stack : PHP CodeIgniter, MySQL, jQuery, AJAX, JavaScript, Bootstrap, Postman

- Enhanced and maintained the backend **Admin Portal** for a UAE-based recharge management platform.
- Developed new features for recharge and plan management while ensuring clean, maintainable, and well-structured code.
- Resolved production issues, optimized application performance, and improved overall system stability and reliability.
